PRODUCTIVITY, EFFICIENCY AND SECURITY IN A “ZERO-U,” SINGLE-PORT DEVICE

FEATURES
- Palm-size and highly portable, the Dominion KX II-101 V2 can be mounted vertically or horizontally on the side of a rack, making it ideal for small, remote locations with a limited number of servers.
- Multiple Dominion KX II-101 V2 devices can be installed in a data center, lab environment or remote offices to provide fully non-blocked, switchless access by any user to any server – even if the OS is unavailable – reducing downtime, MTTR and labor costs.
- Dominion KX II-101 V2 features Absolute Mouse Synchronization™, which reduces installation time and sets a new standard for mouse synchronization.
- Virtual media gives users the ability to transfer files for patches and upgrades from any location, speeding up the upgrade process and reducing travel costs.
- Dominion KX II-101 V2 also provides a greater level of security than other remote access methods, feature-rich management functionality and the highest quality video available, all over an IP network.

DOMINION® KX-II-101 V2

SWITCHLESS, SCALABLE, SINGLE-SERVER KVM-OVER-IP

ENTERPRISE-CLASS KVM-OVER-IP TECHNOLOGY IN A PALM-SIZE DEVICE

Dominion KX II-101 V2 is a next-generation KVM-over-IP device that eliminates the blocking factor inherent in switched KVM architectures to provide anytime, anywhere un-blocked access and BIOS-level control of a single server, via a dedicated IP address. The Dominion KX2-101 V2 raises the bar with standard features such as: virtual media, absolute mouse synchronization, 1920x1080 video resolution, Asian language support, IPv6, secure FIPS 140-2 encryption and mobile access via iPhone® or iPad®.

A FULL SET OF FEATURES PLUS AN INNOVATIVE USER INTERFACE

The Dominion KX II-101 V2 is a small but complete package of KVM-over-IP innovations. It works with the industry’s widest range of browsers and operating systems, so you can use almost any combination of OS and browser. It also incorporates Raritan’s Virtual KVM Desktop™ features to provide a user experience that is indistinguishable from an at-the-rack connection.

COMMANDCENTER® CERTIFIED FOR SCALABILITY

Dominion KX II-101 V2 is incredibly scalable. And because it is CommandCenter-certified, a large number of Dominion KX II-101 V2 units can be integrated through Raritan’s CommandCenter Secure Gateway into a single logical network, with a single sign-on from a single IP address.
NEXT-GENERATION FEATURES WITH LIMITLESS NON-BLOCKED ACCESS

VERSATILE APPLICATIONS
The Dominion KX II-101 V2’s unique form factor and non-blocked access make it an ideal remote management platform for:

- Small business, home or branch offices
- Small numbers of servers in remote mission-critical environments, such as energy, utilities, government and military
- Environments that require multaneous, non-blocking connections between large numbers of users and target devices, such as software development labs
- Environments where un-blocked access to mission-critical servers is required
- Environments where target devices are often moved around into different configurations, such as test labs and demo rooms
- Highly mobile applications such as remote broadcast trucks and police/fire/EMS mobile command centers
- Temporary installations such as conventions, trade shows, client/customer sites and construction trailers
- Non-IT devices such as retail/point-of-sale displays, signage and kiosks, as well as medical and military equipment

EASY TO USE
- Absolute Mouse Synchronization reduces installation time and sets a new standard for mouse synchronization
- Virtual KVM Desktop creates a user experience virtually indistinguishable from a local server connection
- PC share mode lets up to eight users remotely access the same server for collaborative troubleshooting
- Plug-and-play appliance is easily installed; up and running in minutes
- Chinese and Japanese language support
- Firmware upgradeable over IP network connection

MULTIPLATFORM COMPATIBLE
- Supports Windows®, Mac®, Linux® and Solaris™ platforms
- Works with Raritan’s Multiplatform Client (MPC)
- Dual stack IPv6 and IPv4

FLEXIBLE
- Small form factor fits in many environments
- Serial admin console port allows local configuration
- Optional modem access
- Remote power management capabilities when integrated with Dominion PX® Intelligent Power Distribution Units (iPDUs)
- Keyboard and mouse connections can be hot-plugged on most operating systems
- Direct port access can be established for quick access to target server
- Factory default settings can be reapplied via the factory reset button
- The KX II-101 V2 can be swapped while the target server is still on, minimizing server downtime
- USB or PS/2 connectivity from same unit
- Mounts horizontally or vertically on side of rack (brackets included)
ANATOMY OF THE DOMINION® KX II-101 V2

MOST SECURE DEVICE IN ITS CLASS

- Up to 256-bit AES encryption
- FIPS 140-2 encryption module for government and military customers
- Secure encryption of keyboard, mouse and video signals, as well as virtual media
- Supports strong password settings and password retry lockout
- Supports RADIUS, secure LDAP and Active Directory® – authenticating users from existing accounts
- Uses access control lists to grant, restrict or deny access
- Multiple security features including: custom SSL certificates, login banner, and configurable port numbers

COMMANDCENTER-CERTIFIED

- Makes use of CommandCenter Secure Gateway’s powerful management features, including centralized role-based policy administration, logging of system activity and user changes, as well as centralized firmware upgrade
- Scales to a large number of units across numerous sites, all accessed through a single sign-on to a single IP address
- Integrates into a single, logical “command and control” network with Raritan’s entire Dominion series of KVM-over-IP switches and serial console server

ENHANCED WITH HIGHEST QUALITY KVM-OVER-IP EXPERIENCE

- Adaptive video settings for lower bandwidth situations
- Sets a new record for Raritan’s award-winning video quality, with support for 32,000 colors
- Supports up to 1920x1080 remote video resolution

VIRTUAL KVM DESKTOP

- Full-screen video, without window borders or toolbars
- Transparent keyboard handling sends virtually all keystrokes to the target server for a more seamless user experience
- Advanced video resolution detection for fast video response and accuracy
- Flexible video scaling, lets users adjust window size from thumbnail to full-screen view
- Apple iPhone/iPad mobile access (CC-SG required)

COST-EFFECTIVE

- Provides remote access and BIOS-level control where deployment of a multiport KVM switch is not economical
- Zero-U form factor saves rack space
- Minimizes expensive and inconvenient travel
- Comes complete with AC/DC adapter, KVM cable and mounting hardware
- Allows IT staff to leverage system expertise across multiple sites
